To register contact:

Ngaio Baril at ngaio.baril@gov.ab.ca, (780) 865-8342

The Foothills Research Institute Stream Crossing Program has teamed up with WOLF, the Woodland Operations Learning Foundation, to offer courses on how to use its stream crossing inspection manual.

All levels of industry and government have a duty and concern to manage crossings for ecological and safety reasons, and the recently developed manual shows how to assess remediation needs and options.
