

# Counting Bears in Alberta and Beyond

**Tuesday March 16th, 7 pm**  
**Canmore Collegiate High School**  
**Gordon Stenhouse**  
**Foothills Research Institute**  
**Grizzly Bear Research Project**

Gordon Stenhouse is a research scientist and the leader of the Foothills Research Institute Grizzly Bear Research Program. This research program began in 1999 and has grown to be one of the largest and most comprehensive bear research programs in North America.

Join Gordon as he reviews 5 years of DNA grizzly bear population inventory in Alberta and demonstrates how these results relate to the Foothills Research Institute Grizzly Bear Research Program's research products. In addition new work on energetics and grizzly bear health monitoring techniques will be discussed in relation to monitoring grizzly bear populations in the future.
