

Impact of Mountain Pine Beetle Outbreaks and Treatments on Caribou and Grizzly Bear Food

Mountain Pine Beetle (MPB) control treatments include:

- Forest harvest
- Prescribed burns
- Single tree cut and burn

How do MPB-killed trees and MPB treatments affect plants other species feed on?

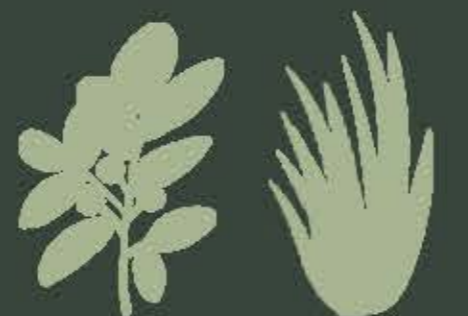

MPB Kill

More abundant

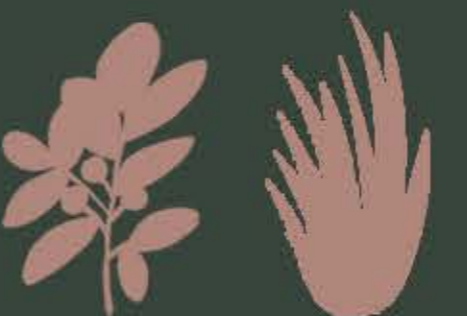

Cut & Burn

More abundant

Harvest

Less abundant

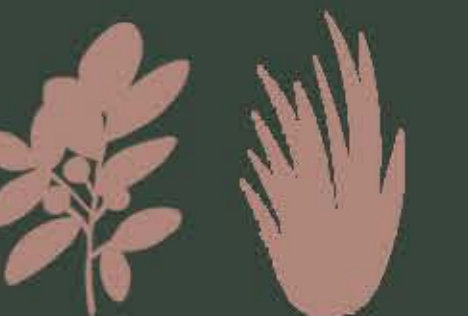

Wildfire

More abundant

No Treatment

Less abundant

Cut & burn controls MPB and maintains food for threatened species.
