

## Help us document Arctic grayling within the Swan River watershed!

This project focusses on understanding how Arctic grayling distribution has changed over time.

To do this, our team will be conducting fish surveys by spin cast and fly fishing throughout the watershed to provide an updated assessment of the Arctic grayling population. We are also looking to interview community members who are interested in sharing knowledge where Arctic grayling was once found and how plentiful they used to be.

### Get involved!

If you are interested in assisting in field work this summer or sharing your knowledge of Arctic grayling please contact: **Kate Marouelli** ([kmarouelli@firesearch.ca](mailto:kmarouelli@firesearch.ca)) and **Kaine Giroux** ([kaine.giroux@srfn.ca](mailto:kaine.giroux@srfn.ca))
